Global Leadership Forum
For Construction Engineering and Management Programs
GLF-CEM

GLF CEM 2023
Salvador, Brazil, 29-30 May 2023

Website: to be launched soon

Announcement

The Global Leadership Forum for Construction Engineering and Management Programs (GLF-CEM) is intended to bring together professors from leading universities around the world who play a leadership and/or administrator role in their respective programs.

The objective of this forum is to establish a body of academic leadership in Construction Engineering and Management to discuss and share issues of common concern in Research, Teaching, Academic Administration, and Opportunities for Collaboration. This two-day conference will include keynote speakers and panel sessions with global leaders.

The next Global Leadership Forum for Construction Engineering and Management Programs (GLF-CEM) will be held from **Monday, 29 May to Tuesday, 30 May 2023, in Salvador-Bahia-Brazil.** GLF advances construction engineering and management programs by sharing program information, trends, and other timely issues worldwide.

The GLF-CEM members are kindly invited to suggest panel themes.

Panel Themes

Leadership in Construction Management
Future Leaders – Future of Research and Future of Education
Women in Construction
Science and Theory of Construction Engineering
Industry and Academic Collaboration
Trends, KPIs, and Benchmarking
